ROOT POINT SALES SHEET

Who We Are

At Root Point, we know that the strategy to your technology solutions is never a one-size-fits-all approach. That's why we work closely with your business to implement custom solutions that meet your specific needs. We know your business has one-of-a-kind goals, which is why we deliver custom solutions with impressive results. Root Point is widely trusted for its extensive experience of over 20 years in the industry, and its expansive toolbox of professional IT resources. Our capabilities span from Cybersecurity, to Managed Services, to a wide range of High-level Offerings. Read on to learn more about everything Root Point has to offer…

Cybersecurity

How well is your organization utilizing modern cybersecurity methods to protect your information? And is your cybersecurity system in compliance with state regulations? At Root Point, we custom design a tightly sealed cybersecurity system that provides a robust solution for your business. We deliver the most advanced responses to security demands, including firewalls, antivirus, OS and database, network, and software, all while meeting government compliance.

- Virtual CIO / CISO
- Audits and Compliance (Internal, SOC, SOX, GRC, GDPR, HIPAA, PCI)
- Staff Training
- Secure System Integration
- Security Operations Center
- Security Event Information Monitoring (SEIM)

Managed Services

While most IT providers are Managed Service Providers (MSP), Root Point takes it several steps further, classifying as a *Managed Security Services Provider (MSSP)*, which provides much more above the basic administrative operations of an MSP. MSSPs go above and beyond by ensuring security, safety, and cyber compliance around the clock. At Root Point, we have several dedicated Certified Information Systems Security Professional (CISSP) on staff. Our customer-centered support works 24/7/365, providing both remote and on-site IT support that is driven by customized strategy that's designed for your business.

Callout: Productive. Proactive. Protective.

- **Monitoring** of device, network, and servers
- **Management** of all IT products
- Vendor Management and Contract Negotiation
- System Architecture and Design

High Level Capabilities:

In addition to our extensive experience with Cybersecurity and Managed Services, we also provide services for every routine IT requirement. Whether you are just getting started, or need assistance with repairing or updating equipment, Root Point will provide professional, reliable support, coupled with customer service excellence.

- Cabling
- Installation services for non-technical equipment – *Call to ask if we can assist*
- PC/Printer Installation and Configuration
- Server/Storage Installation
- Networking Equipment
    - Routers
    - Firewalls
    - Switches
    - Access Points with the associated cabling
